

# SATOSHI GENESIS BLOCK NFT LITE PAPER

In essence, the Satoshi Genesis Block Lite Paper serves as a comprehensive guide to the structure and benefits of the NFT. By delving into the intricacies of the NFT ecosystem, this paper illustrates why holding a Genesis Block NFT is not only advantageous but essential for those seeking to participate in the Satoshi project.

# ABSTRACT

The Satoshi Genesis Block NFT Lite Paper outlines the structure and benefits of the NFT collection associated with the Satoshi project.

This document provides insight into the mechanics of the NFT sale, the relationship between NFT holders and Satoshi tokens, as well as the long-term vision for the project's growth and sustainability.

# INTRODUCTION

The Satoshi Genesis Block NFT collection represents a unique opportunity to participate in the Satoshi project while also engaging with the burgeoning NFT space. This lite paper outlines the key features of the NFT sale, including token distribution, pricing, and the incentives for holding NFTs.

---

Additionally, it explores the broader implications of owning a Satoshi Genesis Block NFT, both as an investment and as a statement of belief in the Satoshi project.

# KEY FEATURES

## Limited Edition Collection

The Satoshi Genesis Block NFT collection consists of 1000 NFTs, each priced at 0.1 ETH. This limited supply ensures scarcity and exclusivity, driving demand for the NFTs. The NFT collection mint took place on the BASE Chain.

## Liquidity Provision

A portion of the proceeds from the NFT sale is allocated to purchasing Satoshi tokens, which are then used to provide liquidity in the V3 pool on BASE Chain. This generates fees for NFT holders and contributes to the overall liquidity of the Satoshi ecosystem.

## Fee Distribution

NFT holders will receive rewards from transactions passing through the V3 pool on BASE, providing an additional incentive for holding NFTs. These rewards can be claimed at any time, further enhancing the value proposition of the NFTs.

# LIQUIDITY PROVISION & REWARDS

In order to enhance liquidity and incentivize participation in the Satoshi ecosystem, a portion of the proceeds will be allocated to providing liquidity in the V3 pool. Specifically half will be utilized to purchase Satoshi tokens, while the other half will be paired with Satoshi in the V3 liquidity pool.

## Liquidity Allocation

For example, with a mint price of 0.1ETH and 1000 NFTs sold, and an ETH price of between \$3,000 and \$4,000, there would be \$300,000 to \$400,000 of liquidity added to the V3 pool.

## Reward Distribution

Of all transactions conducted through the V3 pool on BASE Chain, 1% of rewards will be distributed in the form of Satoshi tokens and/or ETH.

## Fee Structure

The fees associated with the V3 pool will be determined by the volume that passes through the pool, where a fee of 1% is applied.

## Marketing and Claim Wallets

The ETH collected from the liquidity provision will be divided into two wallets:

### Marketing Wallet

Up to a maximum of 100 ETH will go into the marketing wallet for refunding investors, promotional activities and project development.

### Claim Wallet

All ETH rewards after the marketing wallet (MW) threshold is reached (up to a maximum of 100ETH), will be auto sent with SATOSHI tokens to the claim wallet for NFT holders to claim at any time. This will remain forever.

Note: SATOSHI tokens will be going to the claim wallet from the start, thus allowing NFT holders to begin receiving rewards in SATOSHI tokens from the start.

# WHY HOLD THE NFT

“

**Passive income by earning SATOSHI tokens and Ethereum**

”

Owning a Genesis Block NFT offers a multitude of benefits that extend beyond mere ownership. Here's why holding the NFT is not just advantageous, but pivotal to the growth and success of the Satoshi project:

## Project Income and Exposure

**Income Generation:** Holding a Genesis Block NFT directly contributes to the project's income by funding marketing efforts and introducing Satoshi to a wider audience, fostering greater adoption and awareness.

## Creating Buying Pressure

**Market Support:** Revenue from Genesis Block NFT sales is strategically utilized to purchase Satoshi tokens, thus injecting liquidity into the market till the collection is sold out. This creates buying pressure, providing stability and growth potential for the project.

## Potential Value Appreciation

**Price Correlation:** As the value of Satoshi tokens increases, the value of the Genesis Block NFT can also appreciate. Moreover, the collection is already tradeable on NFT marketplaces such as Open Sea and Magic Eden, enhancing exposure.

# TOKEN REWARDS

## Satoshi Token Earnings

Holding the NFT entitles holders to earn Satoshi tokens, thereby incentivizing long-term engagement and loyalty within the community.

## ETH Rewards

Once the marketing reserve threshold is surpassed, NFT holders also receive ETH rewards, augmenting the utility and value proposition of holding the NFT.

# NARRATIVE CONVERGENCE

## Meme Meets Utility

The Genesis Block NFT epitomizes the convergence of memes, utility, and NFTs, serving as a symbolic representation of the Satoshi project's ethos and vision.

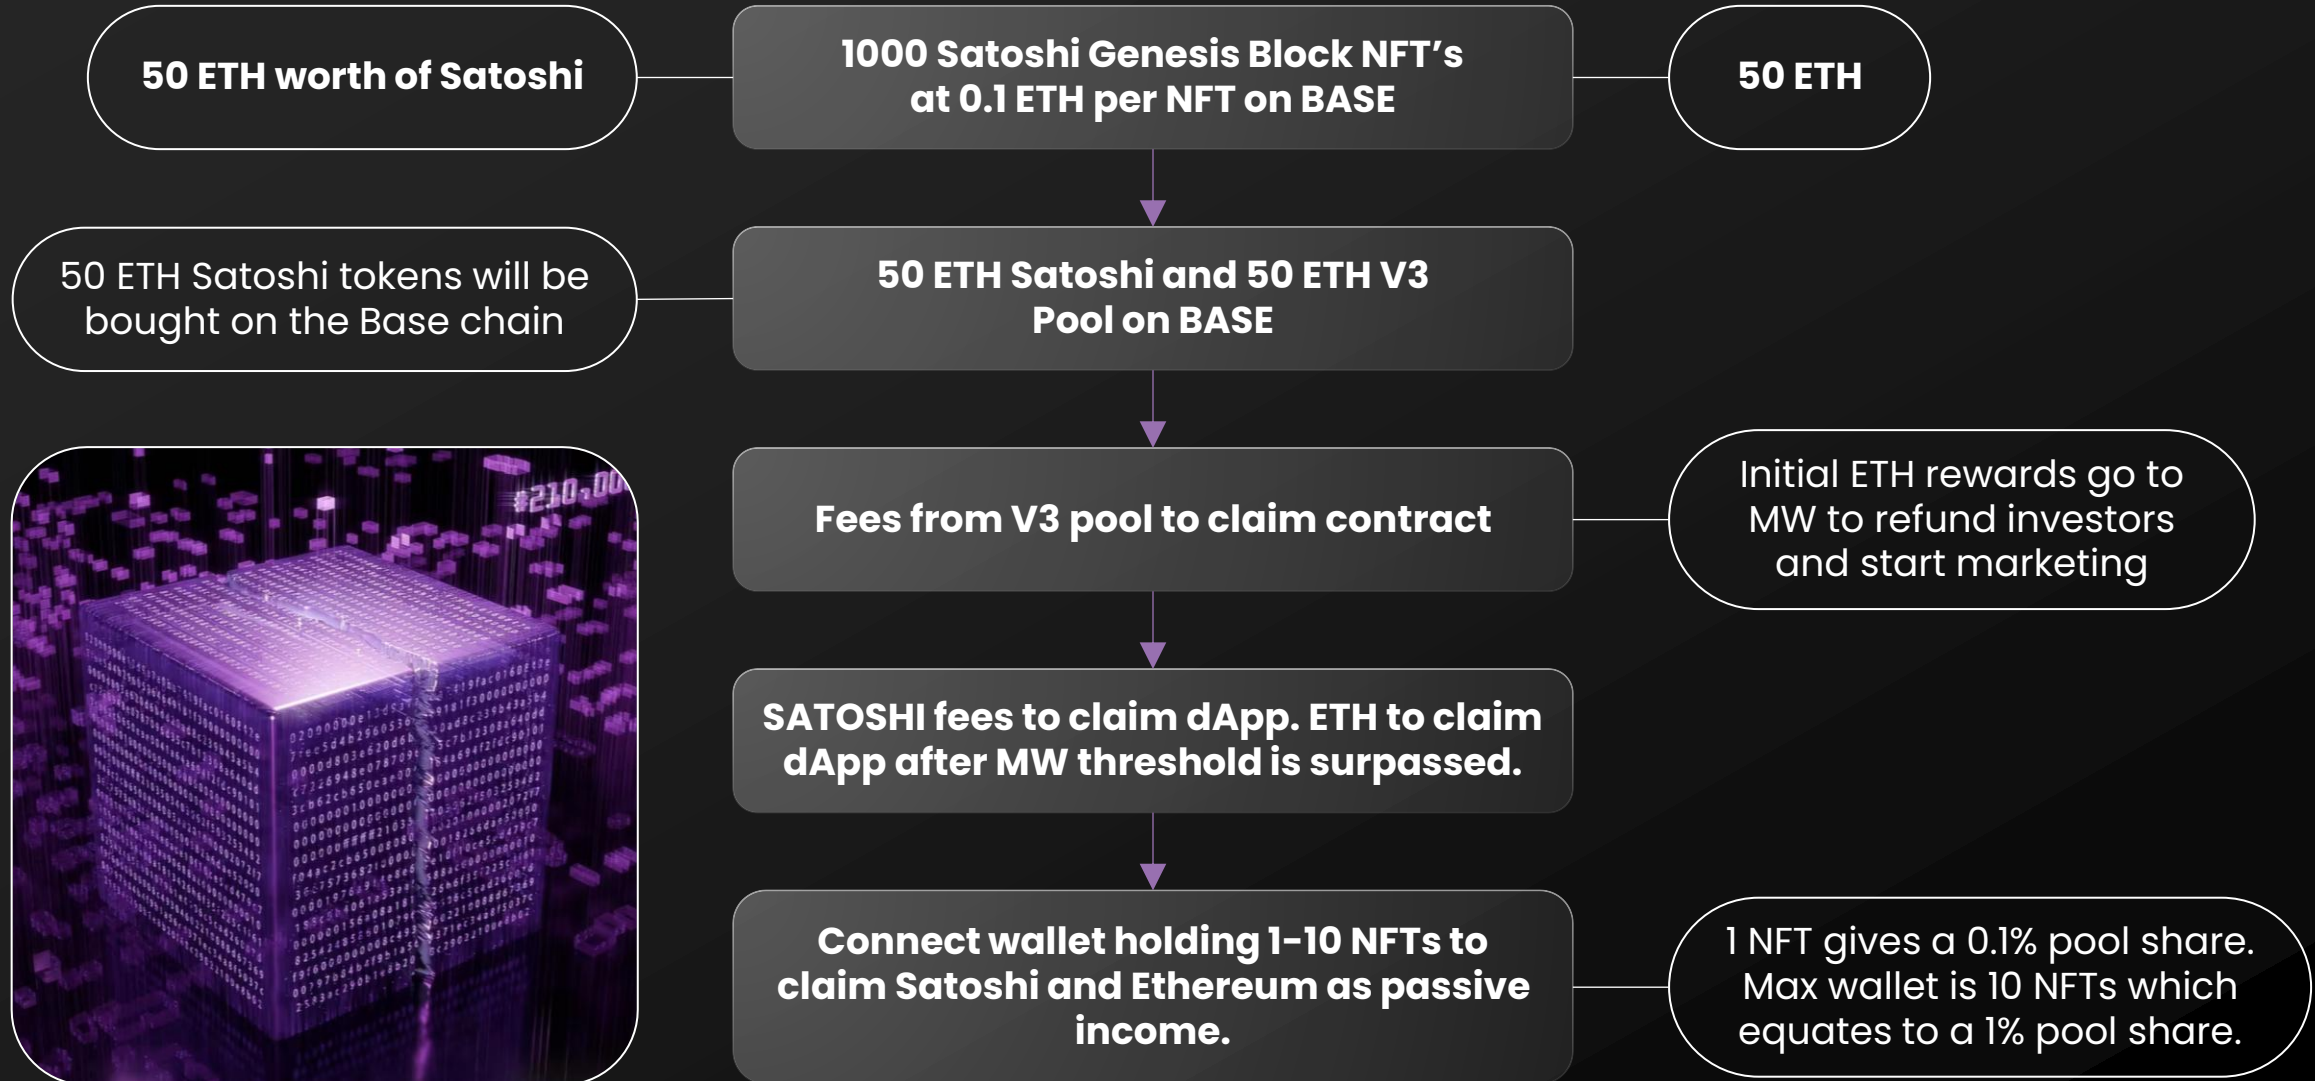

## Narrative Alignment

By holding the NFT, investors align themselves with the project's core narratives, fostering a sense of unity and solidarity within the community.

In essence, holding a Genesis Block NFT signifies a commitment to the growth, sustainability, and narrative convergence of the Satoshi project, while also offering tangible rewards and benefits to NFT holders.
